The open standard

A dermatologist cannot be persuaded. They can only be given the means to verify.

Every page of this catalogue is either a proof or a protocol. The active system, the depth and the pH target are printed on the label of every peel, on the carton and here, in the same words. The batch certificate carries the measured value for each lot.

The practitioner is the customer. Nothing in this catalogue is written for a patient.

MELASTAT™ Yellow Peel Protocol

N°	43
Active system	Retinol · Glycolic · Lactic · Kojic
Depth	Medium
pH	per lot · measured on the batch certificate
Strength	●●●○ 3/4
Contact	3–30 minutes, titrated to Fitzpatrick type
Endpoint	Neutralisation required. Keep neutraliser within reach for every session. Apply at the endpoint until effervescence stops, then rinse thoroughly.
Net	30 g
List price	₹11,995
Home care	melanorm™ · N° 33

In the chair

01 Prep
Cleanse and degrease in clinic. Confirm no active retinoid use and a completed 24 h patch test.

02 Apply
One even coat by brush. Avoid the orbital and lip margins. The film sets yellow — this is expected.

03 Time
Contact 3–30 minutes, titrated to Fitzpatrick type. Start at the shortest interval for FST IV–V and for any first treatment.

04 Neutralise
Apply neutraliser until effervescence stops, then rinse thoroughly. Do not leave the peel on the skin.

05 Aftercare
Soothing barrier cream and broad-spectrum SPF. Strict sun avoidance 5–7 days. Review at 2 weeks.

Why it earns the name

Four acids, one pass
Retinol leads; glycolic, lactic and kojic work behind it. A retinoid-led peel reaches pigment that acid alone leaves sitting.

Timed to the skin type, not the clock
Contact runs 3–30 minutes, titrated to Fitzpatrick type. A peel dosed for FST III–V is a peel built for the skin actually in your chair.

You hold the endpoint
Neutralised in the chair, under your eye. The peel stops when you stop it — nothing is left on the skin and nothing is left to the patient.

Built for the case you refer out
Dermal and mixed melasma, and the post-inflammatory pigment that follows acne and procedures.

SEBOSTAT™ Black Peel Protocol

N°	44
Active system	Black Acetic · Salicylic · Lactic · Mandelic · Liquorice · Tea Tree
Depth	Superficial to medium
pH	per lot · measured on the batch certificate
Strength	●●●○ 3/4
Contact	30 seconds to 3 minutes
Endpoint	Neutralisation required. Spray neutraliser evenly and leave one minute before rinsing. Keep it within reach before the first coat goes on.
Net	30 ml
List price	₹5,995
Home care	sebonorm™ · N° 34

In the chair

01 **Prep**
Cleanse with soap and water and degrease. Patch test 24 h before the first session.

02 **Apply**
One even coat by brush, forehead down to the neck. Lay the whole coat in under 20 seconds so the field times together.

03 **Dwell**
30 seconds to 3 minutes by skin sensitivity. Start at the lower bound on a first session and read the skin, not the clock.

04 **Neutralise**
Spray the neutraliser evenly, leave one minute, then rinse thoroughly.

05 **Aftercare**
Sunscreen and moisturiser twice daily for 7 days. The film darkens and lifts on its own — do not let the patient pick or scrub it.

Why it earns the name

Four acids, four jobs
Salicylic is oil-soluble and works inside the follicle. Mandelic is the largest AHA, so it goes in slowly and evenly. Lactic holds water in while it resurfaces. Black acetic carries the keratolytic finish. A single-acid peel does one of these.

Under three minutes on the skin
30 seconds to 3 minutes of contact. A full acne protocol fits inside a short appointment — the shortest chair time in the range.

An endpoint you can see
The film darkens as it works. You are not reading frosting on a nervous first case; the peel shows you where it is.

For the skin most peels turn away
Oily, congested, comedogenic skin — and pigment-prone skin, which is why the acid load is mandelic-led rather than glycolic-led.

Liquorice and tea tree, not just acid
Liquorice works on the mark acne leaves behind; tea tree on the bacterial load that keeps it coming back.

How to read a label

Strength is one published rule

Never a per-product opinion. The four dots are set by depth and pH target alone, so two peels with the same dots are comparable across the range.

●○○○ 1/4	Superficial peel, pH target 2.6 and above
●●○○ 2/4	Superficial peel, pH target below 2.6
●●●○ 3/4	Medium peel, pH target 2.0 and above
●●●● 4/4	Medium peel, pH target below 2.0

Levels 3 and 4 carry a coloured bar over the spec grid on the label.

pH target, then the measured value

The pH on the label is a target, to one decimal. The batch certificate carries the measured value for the lot in your hand. Where a protocol product is measured per lot, the label says so.

The active system, by name and strength

Each label names the active or actives that define the route. This catalogue uses the same names and adds the strength of each active, as formulated. Where a blend is listed, every component is given with its own strength. The strengths are printed here and nowhere else.

Neutralisation is required

Neutralisation required. Keep neutraliser within reach for every session. Apply at the endpoint until effervescence stops, then rinse thoroughly. No peel in this range is self-neutralising, and no peel is worn home.

Texture

Every peel is a thin, watery liquid, applied by brush or gauze. MELASTAT™ alone is a thick pale-yellow butter in a jar.

The sequence around the peel

01

Prep

Cleanse and degrease. Apply prep solution to standardise the surface.

prepure™ Pre-Peel Prep Solution · N° 40

02

Apply

One to two even coats by brush or gauze. Avoid the orbital and lip margins.

03

Dwell

Leave on for the timed interval, watching erythema and any frosting.

04

Neutralise

Apply neutraliser until effervescence stops, then rinse thoroughly.

Peel Neutraliser · N° 41

05

Aftercare

Soothing barrier cream and broad-spectrum SPF. Sun avoidance 5–7 days.

Soothing Moisturiser · N° 42

Neutralisation required. Keep neutraliser within reach for every session. Apply at the endpoint until effervescence stops, then rinse thoroughly.

Do not peel

- Active dermatitis, eczema or broken skin
- Oral isotretinoin within the last 6 months
- Pregnancy or breastfeeding (defer)
- Known sensitivity to the acids listed
- Recent waxing, laser or resurfacing

Salicylate or aspirin sensitivity

Not for peels that contain salicylic acid: N° 06 · N° 07 · N° 12 · N° 13 · N° 14 · N° 15 · N° 16 · N° 17 · N° 18 · N° 19 · N° 23 · N° 30 · N° 44.

Cautions are those printed in the professional information for the range. The practitioner's own assessment governs.

AHA Superficial | Mandelic Superficial | Retinol Medium | TCA Medium | Pyruvic Medium

Melasma & resistant pigment

5 formulations

N° 08

Melasma Peel · AHA ●○○○ 1/4

₹5,995

A low-irritation melasma peel for sensitive or first-time pigment patients — brightens gradually and safely.

Active system	Glycolic · Lactic · Citric · Kojic	Depth	Superficial
pH target	3.0	Targets	Melasma · Sensitive skin · Even tone
Net	30 ml		

N° 09

Melasma Peel · Mandelic ●○○○ 1/4

₹5,995

A balanced depigmenting peel for everyday melasma and post-inflammatory marks — steady · even brightening.

Active system	Arginine · Mandelic · Kojic · Lactic · Glycolic	Depth	Superficial
pH target	2.6	Targets	Melasma · PIH · Pigmentation
Net	30 ml		

N° 10

Melasma Peel · Retinol ●●●○ 3/4

₹5,995

Our flagship retinol-led yellow peel for resistant melasma — the strongest brightening protocol in the range.

Active system	Retinol · Glycolic · Lactic · Kojic	Depth	Medium
pH target	3.4	Targets	Resistant melasma · Deep pigment · Anti-ageing
Net	30 ml		

N° 11

Melasma Peel · TCA ●●●● 4/4

₹5,995

A TCA-based medium-depth peel for deep · set-in pigmentation — a transparent alternative to branded depigmenting kits.

Active system	TCA · Glycolic · Lactic · Kojic · Niacinamide · Arbutin · Vitamin C	Depth	Medium
pH target	1.8	Targets	Deep melasma · Dermal pigment · Stubborn marks
Net	30 ml		

N° 12

Melasma Peel · Pyruvic ●●●● 4/4

₹5,995

A pyruvic-led peel for stubborn melasma that resists lighter protocols — pushes pigment correction further.

Active system	Pyruvic · Mandelic · BHA · Kojic · TCA	Depth	Medium
pH target	1.6	Targets	Stubborn melasma · Resistant pigment · Texture
Net	30 ml

Brightening & tone

4 formulations

N° 13

Brightening Peel · Glutathione ●○○○ 1/4

₹5,995

A glutathione-forward peel for overall radiance and tone — antioxidant brightening with gentle resurfacing.

Active system	Glutathione · Glycolic · Kojic · Lactic · Salicylic	Depth	Superficial
pH target	2.8	Targets	Dullness · Uneven tone · Radiance
Net	30 ml		

N° 25

Brightening Peel · Strong ●●●○ 3/4

₹5,995

A high-strength brightening peel — maximal glycolic resurfacing plus kojic for fast · visible tone correction.

Active system	Glycolic · Kojic	Depth	Medium
pH target	2.0	Targets	Pigmentation · Dullness · Tone
Net	30 ml		

N° 26

Brightening Peel · Kojic ●●○○ 2/4

₹5,995

A kojic-forward brightening peel — targets uneven tone and pigment with balanced multi-acid resurfacing.

Active system	Glycolic · Lactic · Kojic	Depth	Superficial
pH target	2.4	Targets	Pigmentation · Uneven tone · Dullness
Net	30 ml		

N° 27

Brightening Peel · Multi-Acid ●●○○ 2/4

₹5,995

A layered multi-acid brightening peel — several acids working together for comprehensive tone correction.

Active system	Glycolic · Kojic · Lactic · Pyruvic	Depth	Superficial
pH target	2.2	Targets	Pigmentation · Tone · Texture
Net	30 ml		

Jessner Superficial | Azelaic Superficial | Mandelic Superficial | Glycolic Medium

Active acne & congestion

4 formulations

N° 14

Acne Peel · Jessner ●●○○ 2/4

₹5,995

A classic Jessner-style acne peel — clears active breakouts and decongests oily · blemish-prone skin.

Active system	Resorcinol · Lactic · Salicylic	Depth	Superficial
pH target	2.4	Targets	Active acne · Oiliness · Congestion
Net	30 ml		

N° 15

Acne Peel · Azelaic ●○○○ 1/4

₹5,995

An azelaic-led peel for acne with redness or rosacea — clears breakouts while calming inflammation.

Active system	Azelaic · Salicylic · Glycolic	Depth	Superficial
pH target	2.6	Targets	Acne with redness · Rosacea · Sensitivity
Net	30 ml		

N° 16

Acne Peel · Mandelic ●○○○ 1/4

₹5,995

A mandelic-led acne peel for sensitive and deeper skin tones — clears breakouts with a low risk of irritation.

Active system	Mandelic · Salicylic · Glycolic	Depth	Superficial
pH target	2.6	Targets	Acne · Sensitive skin · Deeper phototypes
Net	30 ml		

N° 17

Acne Peel · Glycolic ●●●○ 3/4

₹5,995

A dual-action peel for acne with marks — clears congestion and fades the post-acne pigment it leaves behind.

Active system	Resorcinol · Lactic · Salicylic · Glycolic · Citric · Kojic	Depth	Medium
pH target	2.2	Targets	Acne · Post-acne marks · Oiliness
Net	30 ml

Home care

8 serums

N° 31

lumira™ Glow Serum AM

₹2,200

A high-strength vitamin C serum for daily radiance — brightens tone and defends against dullness and ageing.

Active system	Vitamin C · Aloe Vera · Hyaluronic	Routine	AM · daily use
Pairs with	Glow Peel	Targets	Dullness · Anti-ageing · Even tone
Net	30 ml		

N° 32

retiva™ Renewal Serum PM

₹2,400

A nightly retinol serum for lines and texture — smooths and renews skin while you sleep.

Active system	Retinol · Hyaluronic Acid · Vitamin C	Routine	PM · daily use
Pairs with	Renewal Peel	Targets	Fine lines · Wrinkles · Texture
Net	30 ml		

N° 33

melanorm™ Melasma Serum PM

₹2,200

A daily melasma maintenance serum — keeps pigment in check between peel sessions.

Active system	Glycolic Acid · Kojic Acid · Vitamin C · Hyaluronic	Routine	PM · daily use
Pairs with	MELASTAT™	Targets	Melasma · Pigmentation · Maintenance
Net	30 ml		

N° 34

sebonorm™ Acne Serum PM

₹1,800

A daily serum for acne-prone skin — keeps pores clear and fades the marks breakouts leave behind.

Active system	Glycolic Acid · Kojic Acid · Vitamin C · Hyaluronic	Routine	PM · daily use
Pairs with	SEBOSTAT™	Targets	Acne · Post-acne marks · Oiliness
Net	30 ml		

N° 35

ocura™ Under-Eye Serum AM · PM

₹2,600

A brightening under-eye serum — targets dark circles and dullness in the delicate eye area.

Active system	Ethyl Ascorbic Acid (Vitamin C) · Hyaluronic Acid · Resveratrol	Routine	AM · PM · daily use
Pairs with	Under-Eye Peel	Targets	Dark circles · Under-eye · Dullness
Net	30 ml		

N° 36

tranea™ Discoloration Serum AM · PM

₹2,600

A tranexamic-acid serum for stubborn discolouration — targets melasma and redness-driven pigment.

Active system	Tranexamic · Azelaic · Niacinamide · Hyaluronic	Routine	AM · PM · daily use
Pairs with	Brightening Peel	Targets	Melasma · Discolouration · Redness
Net	30 ml		

N° 37

poria™ Pore Serum AM · PM

₹1,800

A niacinamide serum for visible pores and shine — refines texture and balances oil for a smoother finish.

Active system	Niacinamide · Vitamin C · Hyaluronic	Routine	AM · PM · daily use
Pairs with	Clarifying Peel	Targets	Large pores · Oiliness · Glow
Net	30 ml		

N° 38

peptia™ Firming Serum

AM · PM

₹2,600

A peptide serum for firmness and bounce — supports collagen for plumper · more resilient skin.

Active system	Collagen Peptide · Palmitoyl Tripeptide-5 · Hyaluronic · D-Panthenol
Pairs with	Lift Peel
Net	30 ml
Routine	AM · PM · daily use
Targets	Firmness · Anti-ageing · Elasticity

Eye cream

1 cream

N° 39

palpia™ Peptide Eye Cream

₹1,195

A peptide under-eye cream for circles · puffiness and fine lines — gentle nightly care for the eye area.

Role	Peptides + Bakuchiol	Use	Home care · PM
Net	50 ml	Active system	Palmitoyl Tetrapeptide-7 · Palmitoyl Tripeptide-1 · Niacinamide · Bakuchiol · Ceramide NP
